 Number of Holdings: 196
 Annual Turnover Rate (10/07): 84%
 Morningstar Category: Small Growth
 NAV: \$16.84
 Fund Manager (Tenure on Fund): Richard Thompson (10/05)

Risk Bar as of 3/31/08

Investment options and, when applicable, their indexes are plotted on the risk bar according to their standard deviations. Morningstar maps the 3-year standard deviations of all funds in its universe to a percentage value between one and 100, then divides the percentage values into thirds. Products are classified as having low, moderate or high volatility. Fidelity plots all money market and managed income/stable value products into the lowest percentile, and all company stock funds into the highest percentile. Standard Deviation is a statistical measure based on the dispersion of an investment's return over the previous 36 months. A higher standard deviation indicates a wider dispersion of past returns and thus greater historical volatility (risk). Risk bar not available for products with less than 36-month history.

Performance as of 3/31/08

	CUMULATIVE RET. (%)		AVERAGE ANNUAL RET. (%)				
	3 Mo.	YTD	1 Year	3 Year	5 Year	10 Year	LOF
Fund	-15.42	-15.42	-13.48	5.30	12.97	4.17	8.29
Russell 2000	-9.90	-9.90	-13.00	5.06	14.90	4.96	---
Small Growth Cat Avg.	-14.45	-14.45	-10.68	4.31	13.03	4.39	---

The performance data featured represents past performance, which is no guarantee of future results. Investment return and principal value of an investment will fluctuate; therefore, you may have a gain or loss when you sell your shares. Current performance may be higher or lower than the performance stated. To learn more or to obtain the most recent month-end performance, call Fidelity or visit www.401k.com. To learn more or to obtain the most recent month-end performance, call Fidelity or visit www.401k.com (log in, choose plan, select "Investment Choices & Research", and then pick investment option.).

Total returns are historical and include change in share value and reinvestment of dividends and capital gains, if any. Life of Fund figures are reported as of the inception date to the period indicated. These figures do not include the effect of sales charges, if any, as these charges are waived for contributions made through your company's employee benefit plans. If sales charges were included, returns would have been lower. Indices are unmanaged and you cannot invest directly in an index.

The Morningstar Category Average is the average return for the peer group based on the returns of each individual fund within the group. It assumes reinvestment of dividends and capital gains, if any, and excludes sales charges.

Who May Want To Invest

- Someone who wants to focus on small-capitalization stocks in search of above-average returns.
- Someone who is comfortable with investing for the long term and with the higher investment risk investing in smaller companies generally involves, in exchange for offering greater potential for long-term reward.

Morningstar Rating[†] as of 3/31/08

Morningstar Category: Small Growth

★★★

Overall

Out of 681

★★★ 3-Year Out of 681	★★★ 5-Year Out of 561	★★★★ 10-Year Out of 268
-----------------------------	-----------------------------	-------------------------------

For a mutual fund, the expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percent of the fund's total net assets. Mutual fund data has been drawn from the most recent prospectus.

The Overall Morningstar RatingTM for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics, calculated as of the date shown. Past performance is no guarantee of future results.

FIDELITY SMALL CAP INDEPENDENCE FUND

OBJECTIVE

Seeks capital appreciation.

STRATEGY

Normally invests primarily in common stocks of domestic and foreign issuers. Normally invests at least 80% of total assets in securities of companies with small market capitalization (those with market capitalization similar to companies in the Russell 2000). Uses fundamental analysis to select investments. Invests in either 'growth' stocks or 'value' stocks or both.

RISK

The value of the fund's domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to the activities of individual companies, and general market and economic conditions. You may have a gain or loss when you sell your shares. The securities of smaller, less well-known companies may be more volatile than those of larger companies.

(% of Total Net Assets)

The Russell 2000® Index is an unmanaged market capitalization-weighted index of 2,000 small company stocks of U.S. domiciled companies.

‡For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating (based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. Each share class is counted as a fraction of one fund within this scale and is rated separately, which may cause slight variations in the distribution percentages. If the fund has multiple share classes, the Morningstar Rating is for the share class specified only; other classes may have different performance characteristics. ©2008 Morningstar, Inc.
